

The McCloskey Mini Sizer is a unique and compact solution for high quality screening when on-site space and transport options are at a minimum. Its 5 ft. x 5 ft. (1.5 m x 1.5 m) double deck screen box will process up to 50 cubic yards (40 m<sup>3</sup>) of material every hour and is suitable for all applications. With options for a trailer and hydraulic jacklegs for swift loading and unloading, the McCloskey Mini Sizer is a complete screening solution.

### Features, Benefits, and Options

- Extremely compact for congested sites
- Processes most materials
- Both decks are end tensioned
- Electric power pack available
- Acoustic canopy available
