

Rapwrangler

The **Rapwrangler™** is designed to be powerful, efficient and easy to maintain. It can be used to render football sized chunks of Asphalt down to less than 20mm at a rate of 60-250TPH. The **Rapwrangler™** eliminates off-site pre-crushing of asphalt materials to be recycled.

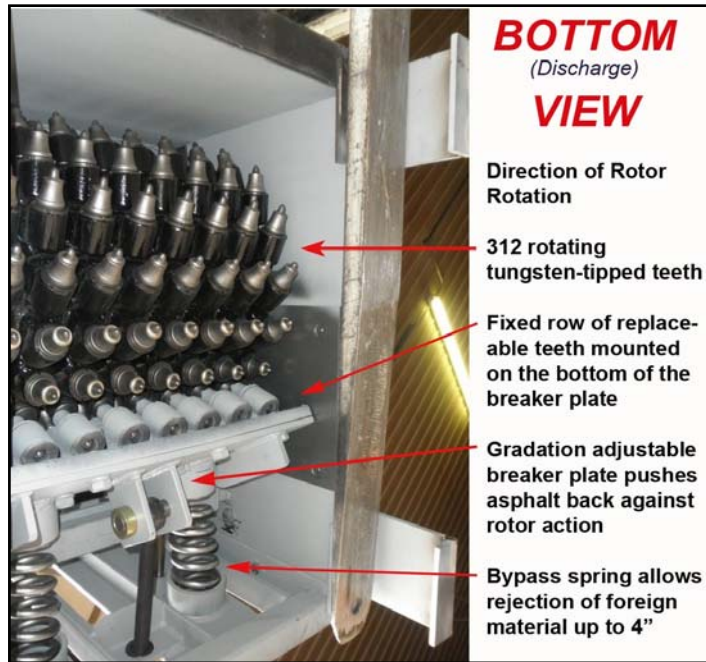

HERE IS HOW THE RAPWRANGLER™ WORKS

Manufactured by:
ACE Group
Free Phone: 1-888-878-0898
Free Fax: 1-888-310-2185

The 20" rotor is equipped with 312 replaceable tungsten-tipped milling teeth that shred football size chunks of asphalt down to 1" at a rate of up to 250 tons/hour. The rotor spins at 127 RPM constantly undermining the material in the 30" x 40" hopper directly above it.

The **Rapwrangler™** is designed to size material in congealed and over size milling stockpiled at a rate of 20-250TPH. It may be set up with any size milling tooth. Your cost of processing RAP is as low as US\$0.45 per ton.

RAPWRANGLERS IN ACTION

The **Rapwrangler** is mounted on a steel frame base. A portable feeder conveyor is on the left and a final RAP conveyor is underneath feeding up to the drum plant.

ADM Plant with **Rapwrangler** mounted on steel frame base.
