COBRA 230

IMPACT CRUSHER

terex.com/EvoQuip

COMPACT

The compact size and weight of the EvoQuip Cobra 230 makes it easy to transport and an ideal machine for urban inner cities.

The low feed in height allows the machine to be fed without building a ramp.

EASE OF USE

ELECTRICAL CONTROL SYSTEM

- Quick set up time
- Intuitive 'push button' control system
- Start up with 2 button presses
- No tools required for closed side setting adjustment
- Move the machine without stopping crusher

OPTIMAL MATERIAL FLOW

- As material flows through the machine each section increases in width
- Two independent hydraulic controlled aprons to optimise material throughput
- Hydraulic overload protection as standard
- Excellent under crusher clearance
- Ability to lower product conveyor while running should a blockage occur
