Mobile Screening and Crushing

SR transport

Anaconda International is shipping with a reduced carbon footprint – so prices don't cost the earth!

Mobile Screening and Crushing (New Zealand) Ltd import Anaconda Equipment International's range of screening equipment, including three mobile screening plant (available tracked or wheeled) and a range of tracked and wheeled stockpiling conveyors.

Each complete mobile screen is designed to ship via one 40ft-high cube container, with minimal assembly required upon delivery. This method of shipping equates to a substantial saving in delivery costs to the end user, greatly impacting the retail price. Although compact enough to fit into a container the Anaconda screeners pack a fair punch, with throughput of up to 300TPH!

DF410

The DF410 tracked scalping screener is designed as an entry-level screener that has a lot to offer customers looking to achieve tonnages without the high price tag. The DF410 is ideal in compact urban spaces and will get through tonnages of up to 300TPH. It is suitable for many applications, including construction and demolition waste, crushed rock, topsoil, compost, sand/gravel and coal.

SR410

The SR410 tracked screener is the latest addition to Anaconda's range of screeners, producing good tonnages at the right prices. The SR410 has been primarily designed for the sand/gravel and aggregate markets, and

can be loaded directly with a shovel/excavator or from the belt of a crusher. The SR410 can product tonnages of up to 250TPH. Applications include sand/gravel, aggregates, coal, compost and topsoil.

TD516

The TD516 tracked trommel is a compact trommel screen designed with quality, performance and ease of movement. Quick and easy to transport around, the TD516 is robust and easy to use, ensuring optimum levels of performance every time. Applications include compost screening, soil screening, processing C&D waste, ash and woodchip/bark. ■
